

# **Parent / Student Update On DYRHS Remote Learning Plan**

*Please remember that the situation that we are in is constantly changing and DY will change and adapt to give our students the best opportunity to improve academically.*

## **Student Expectations**

- DY's Remote learning schedule was developed to give both students and teachers a direction to follow throughout this pandemic.
- The primary means of instruction will be done using Google Classroom.
- We are asking teachers to provide small manageable assignments for students to complete.
- We are expecting our teachers to be available by email during their scheduled class time. Example if a student has Biology A Block his or her teacher should be available by email during that block to help students navigate the assignment.
- We would like students to try and follow their class schedule and log into their specific class using google classroom at the designated time.
- However we know that during this remote learning time students may not be available during the scheduled time or the technology they are using is not available at that time. We know that in many homes there are more than one sibling using a limited amount of technology and this can make specific times difficult to adhere to.
- If students cannot log in to Google Classroom during their designated class time then they should log in when they have a chance.
- Students and Parents should feel free to email their teacher and assistant principal with any academic questions.
- We would hope students would make every effort to try and complete the assignments posted by our teachers.
- I have asked all teachers to extend deadlines on previous assignments to give students an opportunity to make up any work for term 3.
- Teachers will be available for a discussion through email or google classroom during "class time"
- Teachers will provide feedback to students on any and all assignments thru email or google classroom.
- Based on the Department of Education Guidelines, students should receive credit for work that is completed.
- If parents or students have technology issues please email the teacher and contact
  - Ms. Govoni [govonij@dy-regional.k12.ma.us](mailto:govonij@dy-regional.k12.ma.us)
- If parents or students have questions regarding their student's IEP or 504 plan please contact
  - Ms. O'Reilly [oreillym@dy-regional.k12.ma.us](mailto:oreillym@dy-regional.k12.ma.us)
- If you have any questions regarding an assignment, your son or daughters teachers, or assignments not being posted please contact your students assistant principal.
  - Mr. Barrett Assistant Principal for grades 8 & 9
  - Mr. Clarkin Assistant Principal for grades 10 & 11
  - Ms. Govoni Assistant Principal for grade 12

Please keep in mind that your son or daughter's social and emotional health is most important to us. We do not want your child to become overwhelmed with any of this. If your son or daughter is feeling overwhelmed they can contact their assistant principal or guidance counselor for help.

Also please understand that our administrators, teachers and department chairs are meeting daily to determine what is best for our students. We are constantly trying to find areas we can help our students during this crazy time. We are going day to day and week to week. I will provide updates weekly on our remote learning program.
