## What is the “Innovation” in . . . Nathaniel H. Wixon Innovation School?

The students at the Nathaniel H. Wixon Innovation School enjoy the longest school day in our district with the addition of 50 minutes each school day. When you add this time cumulatively over the school year, it is the equivalent of 17.5 additional school days each year!

This additional time is what we refer to as our enrichment block, which runs from 2:00-2:50 each day. Students' enrichment classes vary depending on their interests and needs. Each week there are about 160 classes offered. These classes change half way through the year and new classes are offered.

Our goal with the enrichment block is to remediate individual student's skills, integrate new experiences, and accelerate learning opportunities for all students.

### Wixon's Mission Statement

The Nathaniel H. Wixon Innovation school embraces the development of successful students. Our students will have a strong foundation in academic skill development, individual strength to enable ongoing inclusion in co-curricular activities, and strong inner character. These attributes will lead to enhance self-confidence and foster broad participation and continued achievement in middle and secondary school. Our intermediate foundation firmly begins our students' journey down the “path of educational success.”
